

Access & Acceleration

The Danish-German border region has many skills and resources to develop and promote innovative ideas, technologies and products in the health sector.

The Access & Acceleration project benefits from this innovation potential. It integrates Danish and German service providers from the healthcare sector as well as companies and universities in the innovation process of current and future projects.

Project data

- 7 Partner organisations
- 9 Network partners
- Duration: April 2019 - March 2022

Leadpartner: University of Southern Denmark,
Mads Clausen Institute

Our database

We are looking for further service providers from hospitals, companies and institutions to become part of our database. The database supports the search for services such as testing a medical device. Inclusion in the database increases your visibility and allows others to cooperate with you.

You are welcome to forward your information to us via the questionnaire:

Goals of the Access & Acceleration Platform

The Access & Acceleration Platform is part of the project of the same name.

We want to support you in realising ideas and promoting new products, whether in Germany or Scandinavia.

Promoting innovation

- Tools and links help to turn ideas into reality
- Links and contact details provide access to universities, hospitals and other consultancy institutions in the region

Visit the Platform

Introducing medical devices and remedies to the market requires a great deal of experience. Our platform provides information about the differences in the health care system on the German and Danish sides respectively, provides links and information on the regulation of medical devices (Medical Device Regulation, MDR).

Our service is free of charge!

Promoting exchange

- Help to answer the most common questions about innovation
- Database
- Matchmaking events
- Practical examples

These organisations are already part of the cooperation:

Project partners

- University of Southern Denmark, Mads Clausen Institute
- Stryker Trauma GmbH
- SDU Health Informatics and Technology
- University of Lübeck, Clinic for Orthopaedics and Trauma Surgery (University Hospital Schleswig-Holstein), Campus Lübeck
- Mærsk Mc-Kinney Møller Institute
- Christian-Albrechts-Universität zu Kiel, Institute for Innovation Research
- Danish Life Science Cluster

Network partners

- Life Science Nord Management GmbH
- Syddansk Sundhedsinnovation
- Business Development Agency Kreis Plön GmbH
- Kalundborgegnens Erhvervsråd
- Sorø Erhverv, Sorø Kommune
- Sydvestjysk Sygehus, AK- og Tromboseklinikken
- SCANBALT
- Flensburg University of Applied Sciences
- IdeaChamp, Reliable Idea Evaluation, Kiel
